

Found and repaired missing configurations for '1' devices and/or trunks.

Symptoms

Describe the symptoms in a single sentence readable for simple users and try to use words a user would search for.

Related symptoms

Add related symptoms, single sentences, in a list. This related symptoms can be used to create a higher hitrate on the symptom when searching

Details

Describe clearly how to recognize the experienced problem. If necessary, use screenshots and describe how the problem can be reproduced. Make sure you never include customer or personal (private) information in the manual and always use the manual theme for layout

Log output

Inter log lines here. Don't use images or screenshots because searching is text-based.

Cause

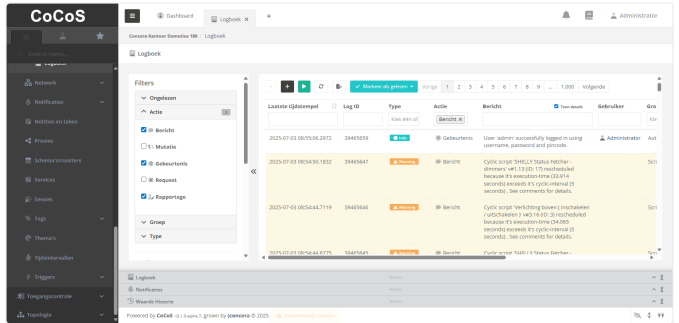

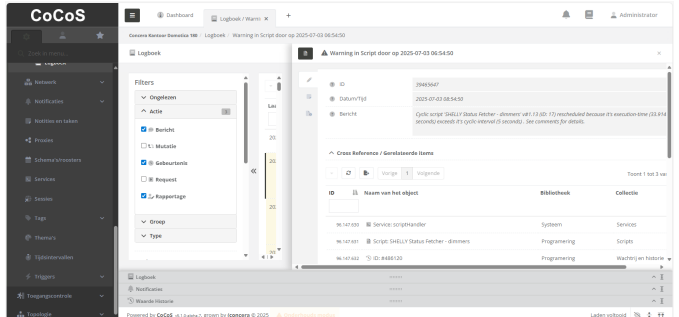

Describe what causes the issue or observation. Describe it in a way a customer with a low experience even can learn from it.

Solution / Resolution / How To

Describe how to fix it, how to validate an observation or describe how to configure a specific case. Only use one title, solution, resolution or HowTo

How to Reproduce

(Optional section)

<p>Step 1: Open the CoCoS Logging</p>	 <p>The screenshot shows the CoCoS Logging interface. On the left is a navigation menu with categories like Network, Notifications, and Services. The main area displays a table of log entries with columns for 'Laatste tijdstip', 'Log ID', 'Type', 'Actie', 'Bericht', 'Team', 'Gebruiker', and 'Gru'. A filter sidebar is visible on the left, and a search bar is at the top.</p>
<p>Step 1: Open Open a logbook item</p>	 <p>The screenshot shows a detailed view of a logbook item. The top part shows the item's ID and a warning message: 'Warning in Script door op 2025-07-03 06:54:50'. Below this, there is a 'Bericht' field containing a detailed log message. At the bottom, there is a table with columns for 'ID', 'Naam van het object', 'Bibliotheek', and 'Collectie', listing various system components.</p>

Application

(Optional section)

Describe in which application / in what way the problem occurred. The issue was noticed when a script was created to open a door using an IO device controlled by webhooks.

References

Describe where to find external answers or extra information's
